BE SURE THAT THE FIREARM IS NOT LOADED.
PRACTICE SAFE FIREARM HANDLING PROCEDURES
AT ALL TIMES.
DO NOT ATTEMPT TO VIEW THE SUN WITH EITHER
THIS PRODUCT OR THE NAKED EYE.

**1x25 Red/Green Dot Sight**

**MOUNTING THE SIGHT --- WEAVER - STYLE BASE**
The BARSKA 1x25 Red/Green Dot sight's unique mount fits all rifles, shotguns and pistols with a Weaver-style base or 3/8" dovetail and .22 base. The factory pre-set is for a Weaver-style base (Fig. 2). To install on to a rifle, shotgun or pistol with a Weaver-style mount, simply loosen the locking nuts (Fig. 1-G), set the sight rail on to the base, align and seat the crossbolt of mounting bracket into the crosscut grooves of the base. Tighten locking nuts.

**MOUNTING THE SIGHT --- 3/8" DOVETAIL AND .22 BASE**
To install the sight on to a rifle, shotgun or pistol with a 3/8" dovetail mount or .22 base mount, loosen both of the locking nuts all the way and rotate mounting brackets with crossbolt upside down and attached to the upper groove (Fig. 3). Set the Red/Green Dot sight on to the gun base. Tighten each crossbolt locking nut.

**NOTE:** For additional security, add a drop of thread-locking compound to the center of each locking nut.

**INSTALLING BATTERY**
The Red/Green Dot sight is powered by a Type 2032 3V "coin style" Lithium battery. To install the battery, unscrew the battery compartment cap (Fig. 1-C) and insert the battery with positive (+) side UP. Replace the battery cover. Refer to "coin cell" NEDA type when purchasing additional batteries.

**NOTE:** Replace battery if reticle dims or does not light at all.

**ZEROING THE SIGHT**
CAUTION: All discharging of firearms should be done at an approved firing range or equally safe area. Use of eye and ear protection is strongly recommended.

Activate the illuminated reticle by turning the rheostat knob (Fig. 1-D) clockwise to brighten and counter-clockwise to dim. The lower numbers represent dimmer settings and higher numbers represent brighter settings of illumination. The red numbers activate the red dot; green numbers activate the green dot. The "0" position indicates the unit is OFF. With the scope mounted, rest the gun on a solid support. Sight along the barrel and aim at a target 50-100 yards away. Look through the sight and use the windage and elevation adjustments (Fig. 1-A-B) to align the lighted reticle with the target.

**Included:** Polishing cloth, spare battery.
