Reassemble Locknut For Metal Detector

Parts

A. Top Stem with Handle
B. Bottom Stem with Coil
C. Washer with Thread
D. Washer with Small Head
E. Locknut

* Actual Model May vary

1. Place the washer with thread (C) on top stem (A) where it shall lock

2. Place the locknut (E) downwards on bottom stem (B).

3. Put the washer with small head (D) downwards on bottom stem (B).

4. Hitch top stem (A) with bottom stem (B).

5. Push locknut (E) upwards to washer with thread and turn locknut in the direction of the arrow until the locknut lock in place.
