Warning: Never attempt to look into the sun with this or any other optical enhancing device. Doing so may cause severe and permanent eye damage. Always follow safe firearm handling procedures when using or handling a firearm.

Mounting

Built in standard 5/8 mount. This mount will attach your sight to your firearm.

1. Loosen the clamp bolts on the mount. Turn counter clockwise.
2. Now place the mount on the rail of the the riflescope.
3. Tighten the bolts but make sure that you do not tighten them all the way.
4. Look through the sight and adjust it, by pulling the sight forwards and backwards.
   Do this until the full field of view is in focus.
5. Once your able to see the entire field of view tighten the mount all the way.

Changing the Battery

Note: Requires 1 AAA Battery (Included)

1. The battery compartment is located on the mount and is directly under the eyepiece.
2. Remove the battery compartment cap off by twisting the cap counter clockwise. Use a screwdriver if necessary.
3. Once the cap is off and the old batteries have been removed place the new batteries into the compartment positive (+) side inward.
4. Replace the cap back on and turn clockwise. Ensure that you place the cap on tightly. This will help keep moisture out of the sight.

Windage and Elevation

Windage is located on the right side of the sight. This adjusts the horizontal axis of the sight.

- Turn Counter Clockwise to move reticle to the right.
- Turn Clockwise to move reticle to the left.

Elevation is located on the top of the sight. This adjusts the vertical axis of the sight.

- Turn Counter Clockwise to move reticle up.
- Turn Clockwise to move reticle down.

Re Zero

Re-Zero: After your scope has been sighted in, you can re-zero the turret caps.

In order to Re-Zero:
1. Use Allen wrench to loosen locking screw by turning it counter clockwise. Make sure to hold onto the turret cap when loosening the screw.
2. Pull the turret cap upwards and rotate it to zero scale. No clicks should be heard when rotating the cap.
3. Push cap back down and replace locking screw by turning screw clockwise to tighten. Make sure to hold onto the turret cap when tightening the screw.

Illuminated Reticle

To turn on illuminated reticle press + sign located on top of the scope.
Use RGB button to adjust color of the reticle and use + or – to adjust the brightness of the reticle.

To turn off illuminated reticle press both the + & - sign together simultaneously.
