**Barska® Security At Your Fingertips**

Since 1994, Barska® has grown to be an industry leader in the security solutions and sporting goods market. Year after year, we continually strive to meet our goal to provide our customers and valued retailers with the latest technology, highest quality and most extensive selection of products available in the industry. By relentlessly working to achieve this goal, Barska® will continue to grow and be recognized as the brand of choice for the most innovative and extensive line of security products. Beginning in 2006 Barska's advancement in the security device industry has been a result of our customers growing need to keep valuables secure. We have expanded our line to include all levels and grades of security solutions. Further, we have developed a high level technical competence in the growing market of biometric (fingerprint recognition) access to safes.

For 2022, Barska® is introducing several new security products for industrial, office and home use. The new parcel mail box is the perfect solution to ensure documents and packages are safely kept till retrieved by an authorized user with key access. We have added two new models to our collection locking mail boxes, that feature a slim drop slot that makes dropping items into the lock box safe and simple for almost any home or business. Key cabinets secure and organize large quantities of keys that are used in everyday business and are ideal for real estate, apartment, hotel, automotive and property management. Our series of fireproof jewelry safes that provides maximum security for protection of valuables. Our biometric keypad door lock safely secures a room with a fingerprint or key code. The perfect security solution to almost any home or office. Ideal for indoor, residential, and commercial use to replace traditional door knob.

A leader in the biometric security products Barska® is introducing several models of biometric safes in different sizes this year. Versatile, the biometric keypad safes feature three access methods; BioSecure™ fingerprint scanner, 4 digit keypad and mechanical key. These quick access biometric safes are available in 4 different sizes with a scratch resistant texture exterior finish.

Barska® vaults, safes, and lock boxes are designed and manufactured to the highest quality standards to ensure customer satisfaction. Whatever your security storage needs are Barska has a security solution for you. If your interested in becoming an authorized dealer of Barska® security products please call us at: 1.888.666.6769 or go online to submit a dealer application at : [www.Barska.com](http://www.Barska.com)

**SAFE TERMINOLOGY**

Here is some of the most common terminology for safes and security systems. In addition to terminology for standard safes, we have also included terminology specific to our biometric fingerprint scanner technology. This information will help you understand each safe's features and specifications. Barska uses standard safe terminology in specifications to make choosing a safe a quicker and simple process.

**BIOMETRIC SCANNING IMAGE SENSOR**

The Biometric safe fingerprint image sensor uses an optical sensor to create a bio algorithm (encrypted mathematical key) of your fingerprint and stores this to memory to access the safe. The Biometric sensor uses advanced industry leading algorithm-mapping technology to read your fingerprint to unlock the safe.

**BIOMETRIC USER MEMORY**

Biometric safes store fingerprints recognition to internal memory storage. Note that these are mathematical keys and not the actual image of a fingerprint. All Barska biometric safes allow multiple users to be saved in memory. It is also recommended to scan and store multiple fingers in to the safes memory in case of extreme injury to a finger.

**USER FINGERPRINT REGISTRATION**

A new Barska Safe is in demo mode, which allows any fingerprint to open the safe. You will need to register a user fingerprint to lock the safe. Simply press and release the registration button on the inside of the safe, then place your finger on the scanner so that the optical sensor can scan your fingerprint. You will hear a confirmation beep when successful.

**CALIFORNIA DEPARTMENT OF JUSTICE APPROVED**

Select safe models have been tested and approved by the California DOJ as a firearm secure storage device. The California DOJ testing procedure is the strictest in the country and qualifies for all 50 state guidelines.

**DEADBOLT SYSTEM**

Select safe models feature motorized dead bolts. These are the thick steel bolts seen protruding from a safe's door. When the safe is locked the bolts slide into position behind the door jamb, anchoring the door firmly shut. Motorized deadbolts secure the locking system preventing any tampering that may cause locking solenoids to fail. Non-motorized deadbolt safes use less power and feature a longer battery life.

**MOUNTING**

Select safe models feature pre-drilled mounting points on the bottom and at the back of the safe. The included lag-bolts allow you to securely attach your safe to a fixed structure. For added security, it is recommended that safes be secured to a solid structure to prevent the safe from being knocked over or from being carried away.

**BATTERY LIFE**

Select safes are powered by standard AA batteries and can last up to 2 years with normal use. Non-motorized deadbolt safes use less power and feature a longer battery life. If the batteries have lost their charge the safe can still be opened via the mechanical back-up key or by using a temporary power bypass that connects externally to the safe.

**SECONDARY BACK-UP KEY ACCESS**

Select safes feature a secondary back-up mechanical key access. The access point is normally hidden. All Barska Safes come with a set of back-up keys.

## Biometric Rifle Safes

The Biometric Rifle Safe from Barska is a great way to keep rifles and other firearms securely stored while allowing only select users access to the contents in seconds without the need for a combination or a key. The advanced Biometric Fingerprint Identification System features an optical scanner that analyzes the scanned fingerprint and compares it to unique characteristics of those stored in the safes 120 fingerprint memory. Only those who have had their fingerprints registered into the Biometric Modules database will be able to open the safe. In addition to the fingerprint recognition technology, this safe is secured by dead bolt made of one-inch steel locks.

## Biometric Safes

Barska® biometric safes are the ultimate in quick access security solutions for the home and office. Secure and access your valuables in seconds with the simple scan of a fingerprint. With Barska biometric safes you will no longer have to waste time looking for your keys of entering a combination, all you need to access your safe is your fingerprint. Barska® biometric fingerprint scanners are the highest resolution and most advanced in the safe industry. Popular models such as the standard size biometric safe model: AX11224 feature silent access modes, 120 fingerprint user memory, motorized dead bolts and is approved by the California DOJ as a firearm storage device. Model AX11652 quick access biometric rifle safe by Barska can store up to 4 long rifles with extra room for guns and ammo. In addition to the biometric rifle safe, Barska has other safes of varying dimensions and features such as the biometric drawer safe. The biometric drawer safe fits in most standard dresser and office desk drawers.

### Hotel Keypad Safe

Hotel Safes are the perfect solution for protecting valuables such as traveling documents, jewelry, cash, laptops, and other electronics. Available in a wide range of styles and sizes, we offer hotel safes that can be installed in closets or drawers, as well as easy to mount wall safes. Each safe features a ruggedly designed seamless body, and fully motorized dual locking bolts providing a superior level of security. The easy-to-read LED display and user friendly electronic digital keypad makes it simple to lock and unlock the safe with a user set 3-6 digit code. The keypad is also ADA compliant with comprehensive audit trail capability reducing fraudulent liability claims. LED interior lighting and optional pedestals are great additions creating even greater versatility, and ease of accessibility.

#### Features

- Keypad Memory Can Store One 3-6 Digit Code
- Two Solid Steel Motorized Locking Bolts
- Interior LED light
- Easy-To-Read ADA Compliant LED Keypad Display
- Comprehensive Audit Log
- Three Override Methods; Master Code, CEU and Spare Keys
- Pre-Drilled Holes Allow The Safe To Be Mounted Into The Floor, On A Shelf Or Counter Top
- Operates On 4-AA Batteries (Included)
- Includes, Set Of Emergency Back-Up Keys And Mounting Hardware

## Biometric Fireproof Safe

Designed to provide maximum security for your valuables. These safes feature fireproof construction and are fitted with two solid-steel long locking bar bolts and pry-resistant recessed door for maximum security. Our biometric safes are the ultimate in quick access security solutions for the home and office. Secure and access your valuables in seconds with the simple scan of a fingerprint. With Barska biometric safes, you will no longer have to waste time looking for keys or entering a combination, all you need to access your safe is your fingerprint. The inside storage is more humanized. The interior is carpeted to avoid the items from being scratched or damaged. There are key hooks and net pockets on the door back. Users don't need to pull out the commonly used documents and passports from a large pile of items in the safe.

### Features

- Fingerprint Memory Can Store Up To 100 Users
- Two Solid Steel Long Locking Bar Bolts
- Fireproof up to 30 Minutes at 1,200°F Degrees Fahrenheit
- Protective Carpeted Interior
- Convenient Key Hooks and Net Pockets (select models)
- Pre-Drilled Mounting Holes
- Operates On 4-AA Batteries (Not Included)
- Includes Set Of Emergency Back-Up Keys And Mounting Hardware

## Jewelry Safe

Organize and protect jewelry from fire in this stylish jewelry safe. Interior features attractive drawers to organize jewelry. The compartments can safely store and organize jewelry of various sizes such as rings, earrings, necklaces, bracelets, bangles, anklets, watches etc. This attractive safe is constructed from solid steel and has been designed to provide fireproof protection to the valuables inside. An ideal size to be placed in a dressing room, next to a vanity or in the corner of a closet. The interior features a motion sensor light that is automatically activated each time the safe is opened. The compartments are lined in a soft fabric to avoid the items from being scratched or damaged. A digital keypad retains one PIN code and allows authorized users to quickly access their belongings inside.

### Features

## Keypad Depository Safe

Depository safes or drop safes are an important tool in safe guarding items from thieves and/or employees. Instead of leaving large bills inside the register simply drop the items of value into the access portal in the safe where it stays safely out of reach. This makes dropping items into the safe simple for businesses that need to protect their deposits before they need to go to the bank. In the situation that years have passed and the batteries need to be replaced or have forgotten the numeric key codes, back-up keys are included with Barska safes.

### Features

- Retains 1 Master Code and 5 User Codes
- Lock Out Mode
- Pre Drilled Mounting Holes
- Operates On One 9V Battery
- Includes Set Of Emergency Back-Up Keys And Mounting Hardware

Keypad Lock Retains One Master Code and Five User Codes

## Depository Safes

Depository safes or drop safes are an important tool in safe guarding cash from thieves and/or employees. Instead of leaving large bills and extra cash inside the register, simply drop the items of value into the access portal in the safe where it stays safely out of reach. This makes dropping items into the safe simple for businesses that need to protect their deposits before they need to go to the bank. To prevent someone from fishing out money or deposit bags with a tool or a coat hanger the large and standard models feature anti-fishing baffles and jagged edge teeth on the door drop slot which prevents item from being fished back out. The compact model features an easy access deposit slot that makes it easy to slide items into the safe. In the situation that years have passed and the batteries need to be replaced or have forgotten the numeric key codes, back-up keys are included with Barska safes.

### Features

- Retains Two Pin Codes
- Two Solid Steel Locking Bolts
- Lock Out Mode
- Pre Drilled Mounting Holes
- Operates On 4-AA Batteries (Included)
- Includes Protective Floor Mat Ensuring That Items Are Not Scratched, Set Of Emergency Back-Up Keys And Mounting Hardware

## Depository Safes

Depository safes are mainly used for short-term storage of cash. Ideal for hotels, gas stations, motels, restaurants or any retail business that deals with large volumes of cash on a daily basis. To prevent someone from fishing out money or deposit bags with a tool or a coat hanger the large and standard models feature anti-fishing baffles and jagged edge teeth on the door drop slot which prevents item from being fished back out. In the situation that years have passed and the batteries need to be replaced or have forgotten the numeric key codes, back-up keys are included with Barska safes.

### Door Drop Slot

Allows for quick deposits and secure storage for cash and miscellaneous valuables.

### Anti-Fishing Baffles and Jagged Edge Teeth

To prevent someone from fishing out money or deposit bags with a tool or a coat hanger being fished back out.

**Pistol Safes**

When it comes to personal protection, speed counts. The Barska Handgun Desk Safe delivers speed, reliability, and convenience in one compact package. The quick access pistol safe is equally as fast as it is discreet. The drawer quickly slides open to reveal the pistol. The interior is lined in thick foam to protect items from damage and to prevent rattling. Made from a robust solid steel build ensures that tampering with the desk safe is simply not possible.

Features a matte black textured finish which will not call attention to its presence. It is the ideal choice for a home or business looking for added security. This desk safe includes a mounting bracket that can easily be mounted to the right or left side. A discrete silent access mode allows the user to access the firearm within without alerting anyone. Includes back up keys that will override the lock and open the pistol safe.

# iBOX®

#1 BIOMETRIC  
Secure Storage

## Dual Access Biometric Secure Storage

The iBOX® Dual Biometric Secure Storage Device by Barska is an innovative portable secure storage device that allows the user to quickly store and retrieve important valuables. The iBOX® features two biometric fingerprint scanning sensors, which provides quick keyless entry and eliminates the need to use a key to open the iBOX®.

### Dual Scanners

The Dual Access Biometric Scanners feature a 500 DPI Optical Reader, while providing convenient back-up reliability with the unique Dual Scanner System.

### Keyless Entry

A Touch Sensor detects when a finger is placed on the Biometric Scanner, which quickly opens the iBOX® and eliminates the need to use keys.

### Durable & Convenient

The durable ABS construction and the compact size of the new iBOX® allows it to be easily transported while keeping valuables secured and protected.

## Security Solution

The iBOX® has been designed to be the ultimate portable security solution, giving the user the peace of mind that their valuables are safely secured, yet still accessible with just the touch of their finger. The inside dimensions are spacious enough to accommodate multiple items such as cameras, tablets, smart phones, passports, money, jewelry, and other valuables. The convenient size of the iBOX® makes it ideal for home, office, travel, car, and student use.

### Biometric Module

The iBOX® Biometric Module Prism is made with a protective synthetic glass that allows for continually accurate scanning throughout the lifetime of the product.

## Lock Boxes

### Combination Compact Lock Box AX11678

The compact combination lock box features a solid steel construction in a compact lightweight design. This easily portable design can be stored and hidden away for safekeeping. Included with the lock box is a long self-locking security cable to keep your valuables safely attached to a large fixed object. Ideal for safely storing money, passports and jewelry.

- Compact In Size
- Retains One Combination Code
- Includes Security Cable

### Drawer Style Compact Lock Box AX11810

Security to go! An ideal size lock box for the car or when traveling to keep personal items protected. Open lock box by inserting key and either gently pulling or pushing the drawer from outer casing. Easily install the long self-locking security cable so that the lock box can be tethered to a large fixed object for added security. Cable hole lets you charge an electronic device while safely locked inside the safe.

- Compact In Size
- Secure Barrel Key
- Includes Mounting Sleeve And Security Cable

### Compact Key Lock Box with Mounting Sleeve AX11812

This compact key lock box is perfect for locking your valuables inside your vehicle boat, home, RV or office or wherever you need to secure down the security lock box. Steel mounting sleeve has six pre-drilled holes and mounting hardware included for easy installation. Once the sleeve is mounted the sleeve holds the lock box in place. Only the key will release the box from the sleeve. The lock box can be mounted almost anywhere hidden away from prying eyes. When you want to move the lock box, unlock the lock box from the sleeve and take it with you. To open the lock box insert and turn the key and lift lock box door to open.

- Compact In Size
- Pre-Drilled Holes Allow The Lock Box To Be Mounted Into The Floor, On A Shelf Or Counter Top
- Includes Mounting Sleeve And Set Of Keys

## Key Storage Cabinets

Keep keys organized and secure in these multi key lock boxes. Equipped with a locking door for added security. The hooks allows you to hang keys with or without key tags or hang multiple keys with key ring. Pre-drilled holes and mounting hardware included for easy installation. Most models features a continuous piano hinge which allows a full view of all keys. An indexing chart that has to document the key's hook position corresponding lock, and a drop-in plastic sleeve tethered to the hinge inside the safe provides a hands-free reference. Ideal for home, office, apartment complex, rental management companies, car lots, body shops and many more. Barska key cabinets are available in various sizes from small models that work great for the home or small office to large key cabinets for industrial use that can hold hundreds of keys that are used daily. All Barska key cabinets are backed by a One-year limited warranty.

- One Admin User, 10 Users
- Expandable Up To 35 Users

**Mechanical Key Access**

- Traditional Key Access

Fingerprint Technology

The optical biometric sensor illuminates key ridge characteristics on the users fingerprint that are unique to each finger. Then converts those characteristics into a numeric digital template using an encrypted algorithm. This insures that actual photos/scans of a finger are never stored only an encrypted numeric template.

Radio Frequency Identification

A type of wireless technology that identifies objects that have been fitted with special radio frequency identification tags to communicate with each other. The antenna built in the door lock sends out a short range radio frequency signal to the transponder within the key fob. The transponder then transmits data back to the antenna.

Model	Color	Fingerprint Memory	RFID Memory	Key Code Memory	Key Access	Locking System	Waterproof	Weight lbs

EA12442	Black	Up To 100	0	1	2 Back-Up Keys	Mechanical Lock	No	3

## Biometrics Safes | Frequently Asked Questions

### What is “biometrics”?

Biometrics can be taken literally as ‘life measurement’. The term is usually associated with the use of unique physiological characteristics—such as fingerprints—to identify an individual. The term is mostly associated with security because biometric traits can be used for authentication where a special characteristic of an individual is used to identify them.

### Is biometric technology mature?

**Yes.** Biometric technology has been around for many years being used most effectively for time and attendance and workforce management. Modern advances, coupled with reductions in cost, now make biometrics readily available.

Barska is leading the industry in the integration of biometrics technology for consumer applications. Barska has invested significant resources into the integration of biometric fingerprint scanning technology into safes, lock boxes, and door knobs resulting in affordable, high quality solutions.

### What is a “biometric” safe?

Simply put, a biometric safe is a secure enclosure that uses biometric identification—instead of traditional keys, combinations, or cards—to activate and deactivate the locking mechanism.

In the case of Barska’s BioSecure Technology™, a fingerprint is scanned by sensors that identify the specific mapping of the pre-registered fingerprint to activate mechanical bolts.

### What are the benefits of a biometrics safe?

#### Security

Keys for safes can be duplicated and lost, combinations can be compromised and forgotten, but no one can duplicate a fingerprint. Barska’s biometric scanner is the most secure option available today.

The duplication of biometric fingerprint technology is virtually impossible, only one in one billionth of a chance. Biometric security offers a positive method of user identification with something that cannot be lost, replicated or stolen.

### Simply Put...

- ...Fingerprints are much harder to fake than identity cards.
- ...You can’t guess a fingerprint pattern like you can guess a password.
- ...You can’t misplace your fingerprint, like you can misplace an access card.
- ...You can’t forget your fingerprints like you can forget a password.

### Quick Access

Biometric safe access is instantaneous. Place your finger on the scanner then in under a second the locking mechanism is engaged to open the safe or door, and vice versa. This proves particularly beneficial in times of high stress. No fumbling with keys or mis-typing numbers in a keypad; simply place your finger on the scanner and you have access.

### Lower Cost And Practicality

Fingerprint access eliminates the cost and problems of issuing and managing keys or cards, and there is no PIN to forget, or give away. You will no longer need to change credentials each time a credential is lost or stolen. Lost keys and cards represent not only a security issue, but also impart undo costs and inconvenience on the security manager.

### Please tell me more about the security of a biometrics safe.

Biometric templates cannot be reverse-engineered to recreate personal information and they cannot be stolen and used to access personal information. Also, if desired, access can be granted to multiple people by scanning multiple fingerprints and storing their biometric registrations in the module. This has proven to be highly beneficial to families, police departments for evidence and firearms security, assisted living homes, hospitals for medicine and equipment access, sober-living homes, courtrooms. And no keys to worry about.

What about photocopies or other artificial means to “spoof” the biometrics module into thinking that it is my fingerprint?

The duplication of fingerprint technology is virtually impossible. The act of photocopying a fingerprint that you may have seen in the movies is only in the movies. Biometric technology proves to be a security that cannot be lost, replicated, or stolen (unlike keys, key cards and combinations).
