Barska® An Industry Leader In Security Solutions

Year after year, we continually strive to meet our goal to provide our customers and valued retailers with the latest technology, highest quality and most extensive selection of products available in the industry. By relentlessly working to achieve this goal, Barska® will continue to grow and be recognized as the brand of choice for the most innovative and extensive line of security products. Beginning in 2006 Barska's advancement in the security device industry has been a result of our customers growing need to keep valuables secure. We have expanded our line to include all levels and grades of security solutions. Further, we have developed a high level technical competence in the growing market of biometric (fingerprint recognition) access to safes.

Barska® vaults, safes, and lock boxes are designed and manufactured to the highest quality standards to ensure customer satisfaction. Whatever your security storage needs are Barska has a security solution for you.

SAFE TERMINOLOGY

Here is some of the most common terminology for safes and security systems. In addition to terminology for standard safes, we have also included terminology specific to our biometric fingerprint scanner technology. This information will help you understand each safe's features and specifications. Barska uses standard safe terminology in specifications to make choosing a safe a quicker and simple process. Barska also offers a wide range of safes with a variety of access mechanisms, sizes, and features. Barska also manufactures a wide selection of basic secure lock boxes such as cash boxes, multi key storage safes, compact combination safes, diversion safes and digital keypad safes.

Biometric Scanning Image Sensor

The Biometric safe fingerprint image sensor uses an optical sensor to create a bio algorithm (encrypted mathematical key) of your fingerprint and stores this to memory to access the safe. The Biometric sensor uses advanced industry leading algorithm-mapping technology to read your fingerprint to unlock the safe.

Biometric User Memory

Biometric safes store fingerprints recognition to internal memory storage. Note that these are mathematical keys and not the actual image of a fingerprint. All Barska biometric safes allow multiple users to be saved in memory. It is also recommended to scan and store multiple fingers in to the safes memory in case of extreme injury to a finger.

User Fingerprint Registration

A new Barska Safe is in demo mode, which allows any fingerprint to open the safe. You will need to register a user fingerprint to lock the safe. Simply press and release the registration button on the inside of the safe, then place your finger on the scanner so that the optical sensor can scan your fingerprint. You will hear a confirmation beep when successful.

California Department of Justice Approved

Select safe models have been tested and approved by the California DOJ as a firearm secure storage device. The California DOJ testing procedure is the strictest in the country and qualifies for all 50 state guidelines.

Deadbolt System

Select safe models feature motorized dead bolts. These are the thick steel bolts seen protruding from a safe's door. When the safe is locked the bolts slide into position behind the door jamb, anchoring the door firmly shut. Motorized deadbolts secure the locking system preventing any tampering that may cause locking solenoids to fail. Non-motorized deadbolt safes use less power and feature a longer battery life.

Anti-Fishing Baffles

Installed on the inside of the posting slot of deposit safes, it is a jagged edged sheet of metal that prevents someone from fishing out money or deposit bags with a tool or a coat hanger.

Dual Locking

The safe will have two physical locks on it and this can be a mixture of many types of locks for example key locking & combination or key & digital locking, or a variety of other options.

Dual User

A safe with either two physical locks or an electronic digital lock with two individual user codes programmed into the one lock. Both types require two people to enter their codes before safe will open.

Lock Out Mode

Select electronic digital lock may feature a lock out mode. If the wrong combination is entered too many times this will render the digital lock inactive and it goes into lock out mode or sleep mode for a period of time.

Mounting

Select safe models feature pre-drilled mounting points on the bottom and at the back of the safe. The included lag-bolts allow you to securely attach your safe to a fixed structure. For added security, it is recommended that safes be secured to a solid structure to prevent the safe from being knocked over or from being carried away.

Battery Life

Select safes are powered by standard AA batteries and can last up to 2 years with normal use. Non-motorized deadbolt safes use less power and feature a longer battery life. If the batteries have lost their charge the safe can still be opened via the mechanical back-up key or by using a temporary power bypass that connects externally to the safe.

Secondary Back-Up Key Access

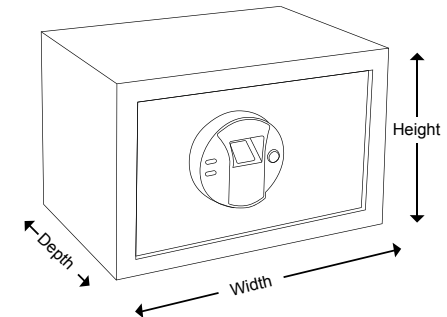

Select safes feature a secondary back-up mechanical key access. The access point is normally hidden. All Barska Safes come with a set of back-up keys.

Outer Dimensions

Depth - Describes the depth of the safe, from front to back, as measured on the outside.

Width - Describes width of the front of the safe, from outside edge to outside edge.

Height - Describes the height of the safe, from top to bottom, as measured on the outside.

Safe One Year Limited Warranty

This warranty does not cover consumer-caused damages, abuse, normal wear-and-tear, unauthorized repairs or modifications. For further detailed information, please refer to the warranty policy enclosed with products. Select models. (Within USA and Canada only)

Security At Your Fingertips
Advanced Biometric Scanning Technology

Biometrics Safes | Frequently Asked Questions

What is “biometrics”?

Biometrics can be taken literally as ‘life measurement. The term is usually associated with the use of unique physiological characteristics—such as fingerprints—to identify an individual. The term is mostly associated with security because biometric traits can be used for authentication where a special characteristic of an individual is used to identify them.

Is biometric technology mature?

Yes. Biometric technology has been around for many years being used most effectively for time and attendance and workforce management. Modern advances, coupled with reductions in cost, now make biometrics readily available.

Barska is leading the industry in the integration of biometrics technology for consumer applications. Barska has invested significant resources into the integration of biometric fingerprint scanning technology into safes, lock boxes, and door knobs resulting in affordable, high quality solutions.

What is a “biometric” safe?

Simply put, a biometric safe is a secure enclosure that uses biometric identification—instead of traditional keys, combinations, or cards—to activate and deactivate the locking mechanism.

In the case of Barska’s BioSecure Technology™, a fingerprint is scanned by sensors that identify the specific mapping of the pre-registered fingerprint to activate mechanical bolts.

What are the benefits of a biometrics safe?

Security

Keys for safes can be duplicated and lost, combinations can be compromised and forgotten, but no one can duplicate a fingerprint. Barska’s biometric scanner is the most secure option available today.

The duplication of biometric fingerprint technology is virtually impossible, only one in one billionth of a chance. Biometric security offers a positive method of user identification with something that cannot be lost, replicated or stolen.

Simply Put...

- Fingerprints are much harder to fake than identity cards.
- You can’t guess a fingerprint pattern like you can guess a password.
- You can’t misplace your fingerprint, like you can misplace an access card.
- You can’t forget your fingerprints like you can forget a password.

Quick Access

Biometric safe access is instantaneous. Place your finger on the scanner then in under a second the locking mechanism is engaged to open the safe or door, and vice versa. This proves particularly beneficial in times of high stress. No fumbling with keys or mis-typing numbers in a keypad; simply place your finger on the scanner and you have access.

Lower Cost And Practicality

Fingerprint access eliminates the cost and problems of issuing and managing keys or cards, and there is no PIN to forget, or give away. You will no longer need to change credentials each time a credential is lost or stolen. Lost keys and cards represent not only a security issue, but also impart undo costs and inconvenience on the security manager.

Please tell me more about the security of a biometrics safe.

Biometric templates cannot be reverse-engineered to recreate personal information and they cannot be stolen and used to access personal information. Also, if desired, access can be granted to multiple people by scanning multiple fingerprints and storing their biometric registrations in the module. This has proven to be highly beneficial to families, police departments for evidence and firearms security, assisted living homes, hospitals for medicine and equipment access, sober-living homes, courtrooms. And no keys to worry about.

What about photocopies or other artificial means to “spoof” the biometrics module into thinking that it is my fingerprint?

The duplication of fingerprint technology is virtually impossible. The act of photocopying a fingerprint that you may have seen in the movies is only in the movies. Biometric technology proves to be a security that cannot be lost, replicated, or stolen unlike keys, key cards and combinations.

We have various sizes and types of rifle safes available to meet your specific needs and budget. Keep your firearms secure and out of the wrong hands with our firearm safes.

SECURITY COLLECTION

Barska has a wide range of reliable home and office safes to keep your valuable possessions protected. With different sizes and style available, you can find the perfect safe to fit your needs and budget.

We offer a wide selection of biometric safe technology products that provide secure access to your valuables using advanced fingerprint recognition technology. Store your valuables with confidence and ease, knowing that only authorized individuals can access them.

We have a wide range of reliable home and office safes to keep your valuable possessions protected. With different sizes and style available, you can find the perfect safe to fit your needs and budget.

Store your valuables in tight, small spaces or while traveling with your valuables.

Enhance the functionality and security of your safe. We have a variety of accessories such as dehumidifiers, lighting kits, locking bolts and replacement keys to keep your safe dry, well-lit and secure.

Depository Safes

Depository safes are an excellent choice for businesses that handle cash frequently. Our selection offers various sizes and features to suit your specific needs. Protect your valuables and minimize the risk of theft.

Key Pad Safes

We offer an extensive line of keypad safes for all your security needs. Our selection includes a wide range of applications, including firearms safes, depository safes, fireproof jewelry safes, compact personal safes and hotel safes.

Key Lock Boxes

Key cabinets provide a secure and organized way to store and manage keys. Prevent unauthorized access to sensitive keys by keeping them locked in key cabinets or key safes.

Business Storage

We offer a comprehensive collection of business storage products designed to keep your office or store organized and clutter-free. With our storage solutions, you can improve efficiency, maximize space and create a professional and productive environment.

Boxes and Mail

A range of parcel boxes designed for secure and convenient package delivery. Parcel boxes come in a variety of sizes and styles to accommodate different package sizes and delivery needs. Select models feature a push button lock system which allows for easy securing packages after delivery.

Medical Cabinets

We offers a comprehensive selection of medical cabinets and medical safe related products designed to keep your medications and medical supplies safe and organized. Our cabinets and safes come in different sizes and styles to fit your specific needs.

RIFLE SAFES

Barska is your trusted partner in safeguarding your valuable firearms collection. Explore our extensive range of Firearms Safes, available in various sizes and equipped with cutting-edge locking mechanisms, including Biometric and Keypad locks. Our collection includes:

All-Purpose Firearms Safes

Versatile safes designed to accommodate a wide range of firearms, providing security and peace of mind for both gun enthusiasts and collectors.

Firearms Storage Safes

Responsible firearm storage is essential. Barska's dedicated storage solutions offer reliable protection and compliance with firearm safety regulations.

Fireproof Firearms Safes

Ensure your firearms remain intact and secure in the event of a fire with our fireproof safes, designed to withstand extreme conditions.

Some of our rifle safes models feature a capacity that ranges from 4 rifles up to an impressive 45 firearms, allowing you to choose the size that best suits your collection. Additionally, many of our safes come equipped with interior LED lights, illuminating your firearms and making them easily accessible in low-light conditions. For added convenience, some safes offer a top-opening option, providing quick and easy access to your firearms when you need them most.

Barska's commitment to quality and innovation ensures that each Firearms Safe in our collection is built to provide maximum protection, convenience, and peace of mind for firearm owners. Whether you're securing a few rifles or an extensive collection, our safes are designed to meet your specific needs.

Explore our Firearms Safes collection today and invest in the security and protection your firearms deserve.

Biometric Keypad Rifle Safe

5.51 Cubic Ft Biometric Keypad Rifle Safe AX13646

- Fingerprint memory capable of storing up to 160 users
- Retains two pin codes
- Equipped with a 10-position rack and one accessory shelf
- Motion sensor alarm
- Offers both single and dual entry modes
- Powered by 4-AA batteries (included)
- Fully lined interior
- Silent access mode feature
- Slip clutch tamper-resistant internal mechanism
- Includes two removable shelves, an external battery pack, a set of emergency back-up keys, and mounting hardware

Biometric Fingerprint Recognition

Access your firearms with the touch of a finger. Our advanced biometric system ensures quick and secure access only to authorized users. Store multiple fingerprints for added convenience.

Emergency Backup Keys

For added peace of mind, the safe includes a set of backup keys, ensuring access in case of electronic failures.

Silent Access Mode

For situations requiring discreet access, the safe offers a silent entry option, allowing you to open the safe without any audible sounds.

Anti-Theft Mounting

The safe can be securely mounted to the floor or wall, preventing unauthorized removal and increasing its overall security.

California DOJ Compliant

DOJ-Approved Safety Device means a firearms safety device that has been tested by a certified FSD laboratory, has been determined to meet the standards for firearms safety devices.

Secure Keypad Access

In addition to fingerprint recognition, the digital keypad provides an alternative entry method. Set your unique PIN code for quick and easy access.

Battery-Powered

The safe operates on batteries, eliminating the need for external power sources and allowing for flexible placement.

Tamper-Proof Construction

Built with rugged materials, the safe's solid steel construction and pry-resistant door provide protection against unauthorized access and tampering.

Spacious Interior

The interior of the safe is designed to accommodate rifles, shotguns, handguns, and other valuables. Adjustable shelving allows for customization to fit your specific storage needs.

BIOMETRIC SAFES

Barska's Biometric Safes Collection combine state-of-the-art biometric technology with reliable construction to ensure your valuables and firearms are protected with unparalleled convenience. Explore our diverse range of Biometric Safes, available in various sizes and purpose-driven designs. Our Biometric Safes collection includes:

All-Purpose Biometric Safes

Versatile safes suitable for a wide range of applications, providing quick and secure access through fingerprint recognition technology.

Firearms Storage Biometric Safes

Responsible gun owners trust Barska's dedicated firearm storage solutions. Our biometric safes offer the perfect blend of security and quick access.

Depository Biometric Safes

For businesses and organizations, our depository-style safes feature a drop slot, making secure deposits convenient and hassle-free.

Medical Biometric Safes

Safeguard your medications and sensitive medical supplies with our specialized medical biometric safes, ensuring authorized access only.

Fireproof Biometric Safes

Protect your valuable documents and items from the ravages of fire with our fireproof biometric safes, combining biometric convenience with peace of mind.

Portable Biometric Safes

On-the-go security has never been easier. Our portable biometric safes are designed to keep your belongings secure wherever you need them.

Barska's commitment to quality and innovation ensures that each Biometric Safe in our collection is built to provide maximum protection, ease of use, and peace of mind. Experience the future of security with Barska's Biometric Safes.

1.2 Cubic Ft Digital Keypad Safe WL120
WardenLight with Interior LED Light
 AX13750

Digital Keypad Safe

Keep valuables safe and secure with the digital keypad safe series by BARSKA. The user-friendly digital keypad retains two pin codes for accessing the contents of the safe, and can also be opened with the included back-up keys. The solid steel locking bolts provide extra security against tampering, and the mounting holes allow the safe to be secured to a flat surface.

Features

- Keypad lock
- Two pin code access
- Back up key access
- Solid steel locking bolts
- Silent access mode
- Pre drilled mounting holes
- Low battery alert
- Made from heavy duty steel
- Includes protective floor mat, emergency back-up keys and mounting hardware

MEDICAL WALL SAFES AND CABINETS

Introducing our Medical Wall Safes and Cabinets – your trusted solution for secure and organized storage of medical supplies. Crafted with precision and designed for efficiency, our cabinets provide a seamless blend of functionality and durability in healthcare settings. Elevate your medical storage with these key features:

Organizational Excellence

Optimize your workflow with thoughtfully designed interiors, featuring adjustable shelves, drawers, and compartments tailored for the systematic storage of medical instruments, medications, and equipment.

Secure Locking Mechanisms

Prioritize patient safety and confidentiality with secure locking mechanisms, providing authorized access to medical professionals while preventing unauthorized entry.

Versatile Configurations

Choose from a range of cabinet sizes and configurations to suit the specific needs of your medical facility. Whether it's a wall-mounted unit or a standalone cabinet, our collection offers flexibility to accommodate diverse requirements.

Space Optimization

Maximize your available space with our cabinets designed for efficiency. Wall-mounted options save floor space, while spacious interiors allow for ample storage without sacrificing accessibility.

Biometric Wall Safe

- Fingerprint memory can store up to 120 users
- Can easily be concealed behind pictures, mirrors or behind furniture
- Solid steel construction
- Pre-drilled mounting holes
- Ideal for items such as medicines, jewelry and important documents
- Includes removable shelves, protective floor mat, mounting hardware, batteries and back-up keys

DEPOSITORY SAFES

Discover peace of mind with our premium depository safes. Designed with precision and security in mind, our depository safes provide a reliable solution for safeguarding your valuables. Whether it's important documents, cash, or other assets, our safes offer a secure and convenient way to protect what matters most.

Keypad Locks

Depository Safes with Keypad locks provide secure access control, with programmable codes for authorized personnel.

Biometric Locks

Depository Safes with Biometric options offer an added layer of security, ensuring that only registered individuals can access the safe via fingerprint recognition.

Spacious Interior

Larger models feature generous storage capacity accommodates various items, making it an ideal solution for businesses, retail establishments, or personal use.

Strong Construction

Built with robust materials, these safes are designed to withstand tampering and resist forced entry, providing an extra layer of security.

Anti-Fishing Mechanism

Select models features anti-fishing technology, preventing unauthorized retrieval attempts through the deposit door.

Bolt-Down Capability

Ensure maximum security by easily bolting down the safe to prevent any unauthorized removal, select models.

Two Compartments

Enjoy efficient storage with two distinct compartments, allowing you to categorize and organize your valuables effectively. Separate compartments provide an added layer of security, as access to one section doesn't compromise the other, offering improved protection for different types of items. The design minimizes the risk of internal tampering, as each compartment operates independently, maintaining the integrity of your stored items. Perfect for businesses handling cash, documents, or other items requiring segregation, a two-compartment safe caters to various needs, making it adaptable for retail, offices, or personal use.

One Compartment

A single compartment safe offers straightforward access, making it ideal for those who prioritize simplicity in securing their valuables without the need for multiple sections. With only one compartment to manage, operating a single-compartment safe is straightforward, minimizing the potential for confusion during regular use. The design simplicity of a single-compartment safe often results in a more compact and aesthetically pleasing appearance, blending seamlessly into various environments.

Single Slot

The straightforward design of a single-slot compartment safe ensures user-friendly operation, making it accessible and easy to use for individuals who prioritize simplicity in their security measures. A sleek and minimalistic design that blends seamlessly into any environment, providing discreet security without the bulk associated with larger or multi-slot safes. Perfect choice for businesses seeking a secure storage solution for crucial paperwork, contracts, or sensitive documents.

Key Storage Cabinet With Key Lock

Included colored key tags allow the user to label each key for easy identification, and a glass door for quickly viewing the contents inside.

Features

- Key lock
- Hook-style cabinet
- Convenient glass viewing door
- Pre-drilled mounting holes

A key lock provides straightforward and reliable security. Its benefits include simplicity, ease of use, and a tangible physical barrier against unauthorized access.

| Model # | Outer Dimensions DxWxH inches | Inner Dimensions DxWxH inches | Locking System | Weight lbs | Includes |
|---------|----------------------------------|----------------------------------|----------------|---------------|--|
| CB12950 | 3 x 15 x 21.75 | n/a | Key | 9.85 | Full set of key tags, labeled key shelves, log sheet, mounting hardware and keys |
| CB12952 | 3 x 10.75 x 13.75 | n/a | Key | 5.65 | Full set of key tags, numbered stickers, mounting screws and keys |
| CB12986 | 3 x 8 x 11.8 | n/a | Key | 3.95 | Full set of key tags, numbered stickers, mounting screws and keys |

Key Lock Box With Combination Lock

Key lock boxes with combination locks provide benefits like secure key storage, convenient access for authorized individuals, flexibility through code changes, and the ability to grant temporary access without physical key handovers.

Features

- Single combination lock
- All steel construction
- Solid steel key hooks
- Pre-drilled mounting holes

Combination locks allow for keyless entry, increased security through customizable codes, and durability since they have fewer mechanical parts prone to wear compared to traditional locks.

Key Lock Box With Combination And Key Lock

These key cabinets offers an efficient solution for managing a large number of keys. With both a combination lock and key lock, you have the flexibility to choose your preferred access method, enhancing security. Features a hook-style cabinet that makes key organization easy and convenient. The two-sided indexing charts have ample room to document the keys hook position corresponding lock, and drop-in plastic sleeves tethered to the hinge inside the cabinet provides a hands-free reference. The key cabinets have four pre-drilled mounting holes and included hardware for installation. The cabinet walls and door are constructed of 0.8mm (21 gauge) solid steel and finished with a matte black or grey coating.

Features

- Combination and key lock
- Hook-style cabinet
- Two-sided indexing chart
- Pre drilled mounting holes
- Variety of styles, colors and sizes to choose from

Key Lock Box With Combination And Key Lock

A combination and key lock offers dual security, combining the advantages of both systems. The key provides a physical backup in case of code-related issues, while the combination adds convenience and eliminates the need for carrying or potentially losing keys. This combination enhances security and accessibility in various scenarios.

HOTEL SAFES

Discover BARSKA Hotel Safe Collection, designed to provide your hotel guests with unmatched security and peace of mind. Our range includes a variety of options to cater to your unique needs, ensuring that your valuables are safeguarded with the utmost precision. Our collection features:

Wall-Mountable Safes

Perfect for hotels and resorts, these safes are discreetly mounted to keep your valuables secure.

Top Opening Safes

Offering convenient access for all hotel guests while maintaining top-notch security, these safes are a reliable choice when used inside a drawer or a dresser.

Laptop-Size Safes

Tailored to fit most common laptops, our safes ensure the safety of your digital assets.

Compact Safes

Ideal for smaller footprint hotel rooms. A great choice for storing smaller items like passports, documents, cash, jewelry and more, these compact safes are versatile and dependable.

What sets our hotel safes apart is their comprehensive audit trail capability, significantly reducing the risk of fraudulent liability claims for hotel owners. Each safe in our collection is equipped with a built-in smart chip, which meticulously records when the safe was opened, and how it was opened.

Accessing this vital information is hassle-free, thanks to our handheld CEU override device (sold separately). It allows you to easily download and review the recorded data, ensuring transparency and accountability for hotel management team.

However, it's essential to note that our hotel safes are not suitable for firearm storage in home or office environments. We prioritize safety and recommend alternative solutions for firearm storage that are specifically designed for this purpose.

Keypad Hotel Safes

- Keypad memory can store one code
- Two solid steel motorized locking bolts
- Interior LED light
- Easy-to-read ADA compliant LED keypad display
- Comprehensive audit log
- Three override methods; master code and spare keys
- Pre-drilled mounting holes
- Includes set of emergency back-up keys, batteries and mounting hardware, CEU not included
